Refugee Advocacy Days

September 1-3, 2020

Background: Refugee Council USA members are hosting Refugee Virtual Advocacy Days on **Tuesday, September 1st - Thursday, September 3rd, 2020**. The advocacy days will occur during a crucial moment just ahead of when Members of Congress and administration officials will be meeting to discuss the refugee admissions goal for FY 2021.

By September 30th, the administration is required by U.S. law to consult with leaders of the [House](#) and [Senate](#) Judiciary Committees before deciding how many refugees can be resettled to the United States in FY 2021. But all Senators and Representatives should hear from their constituents and express their support for refugees with committee members and the administration.

Our country can - and should - safely resettle more refugees and reunite more refugee families. Refugees contribute greatly to the United States in ordinary times, and have continued to show up for their new communities during the COVID-19 crisis, with many working on the frontlines of the pandemic, including 176,000 refugees serving in the healthcare field and 175,000 working as part of the food supply chain. Per CDC guidelines, all international travelers – including refugees – must undergo thorough medical checks for COVID-like symptoms prior to entering the U.S. and are required to quarantine for 14 days upon arrival.

This administration has already cut refugee admissions by more than 80%, from the historic average goal of 95,000 to just 18,000 in FY 2020 – an all-time low. As people who care about refugees, we must send a strong message to Congress that their constituents want to build back the resettlement program by setting the FY 2021 refugee admissions goal at the historic norm of 95,000.

Sample Script: “I’m your constituent from [CITY/TOWN], and I urge you to hold the administration accountable to resettling refugees. The administration is required by law to consult with Congress by September 30th before deciding the refugee admissions goal for Fiscal Year 2021. In the last three years, the administration has cut refugee resettlement by more than 80%, from the historic average goal of 95,000 to just 18,000 – an all-time low. Our country can – and should – safely resettle more refugees and reunite more families. Refugees have contributed greatly to America in ordinary times, and have continued to show up for their new communities during the COVID-19 crisis, with many on the frontlines, including 176,000 serving as healthcare workers and 175,000 working in the food supply chain.
